DETAILED ACTION

It is noted that applicant's response filed March 26, 2004, necessitated the new grounds of restriction [claims 19-20 were amended – changed from being dependent claims to distinct independent claims].

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - R-I. Claims 1-8, 11-13, 15-18, 21-25 & 27-31, drawn to an automated kiosk, classified in class 312, subclass 7.2.
 - R-II. Claims 19-20, drawn to a method of modifying/constructing a kiosk, classified in class 312, subclass 352.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions R-I and R-II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown:

(1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for using the product as claimed can be practiced with another materially different product such as a CPU housing, wherein a side panel of the housing is removed, a strut or brace member within the housing is removed or repositioned, and a new component is installed.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

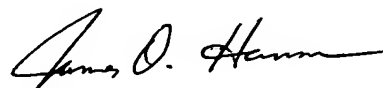

Art Unit: 3637

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
